

T34vsTiger Maya Exporter.

Tutorial 1.

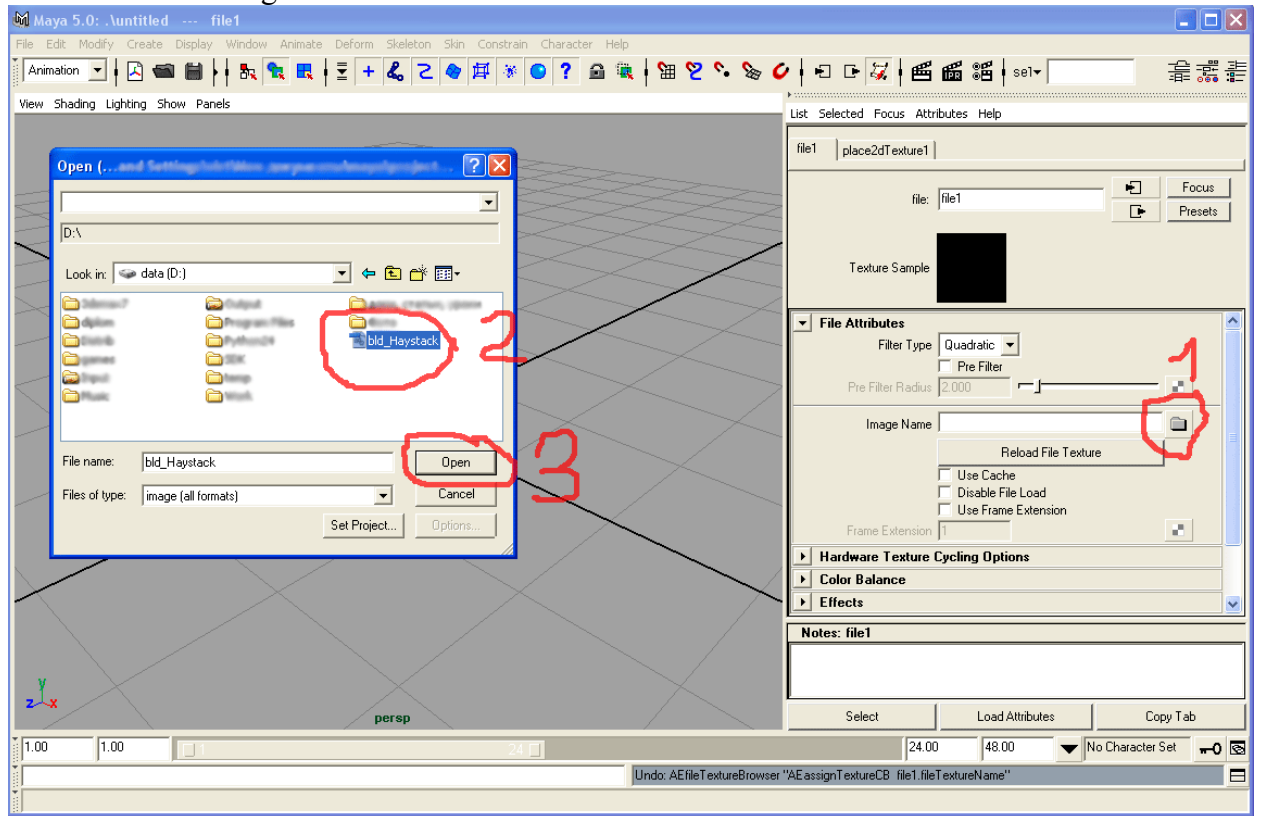

Simple export.

1. Copy Tools/MayaExp.mll from T23vsTider game folder to Maya plug-ins folder (like “C:\Program Files\AliasWavefront\Maya5.0\bin\plug-ins”).
2. Open Maya 5.0 and create a simple primitive.

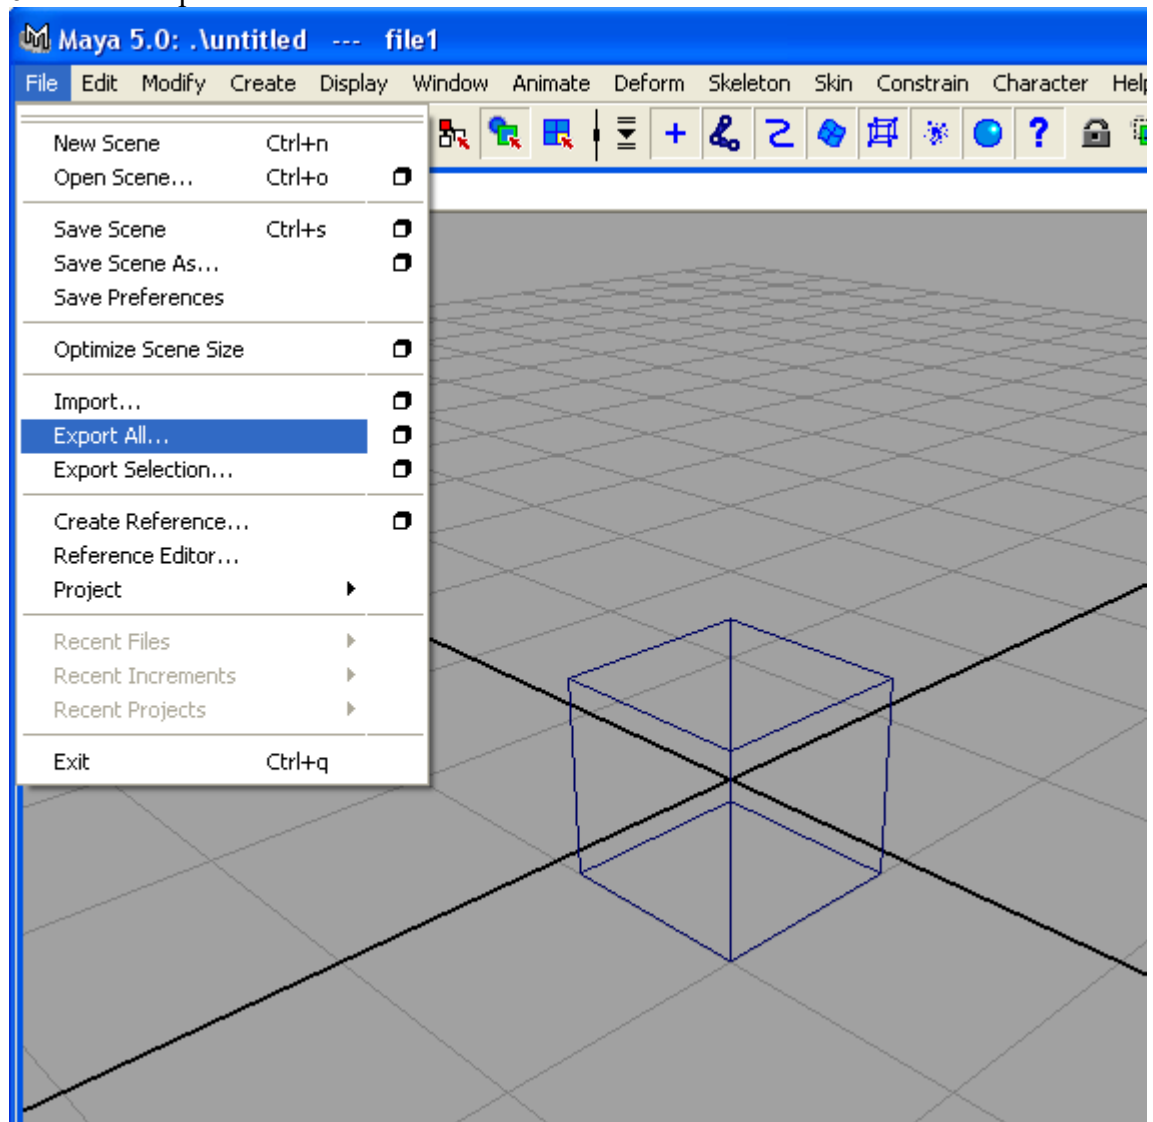

The screenshot shows the Maya 5.0 interface. The 'Create Render Node' dialog is open, with the '2D Textures' section selected. The 'File' texture type is highlighted with a red circle and a red '2'. The 'G5EngineShader4' material is selected in the 'List' tab of the 'Attributes' panel. The 'Common Material Attributes' section is expanded, and the 'Base Texture' field is highlighted with a red circle and a red '1'. The 'Notes' field at the bottom of the 'Attributes' panel contains the text 'G5EngineShader4'.

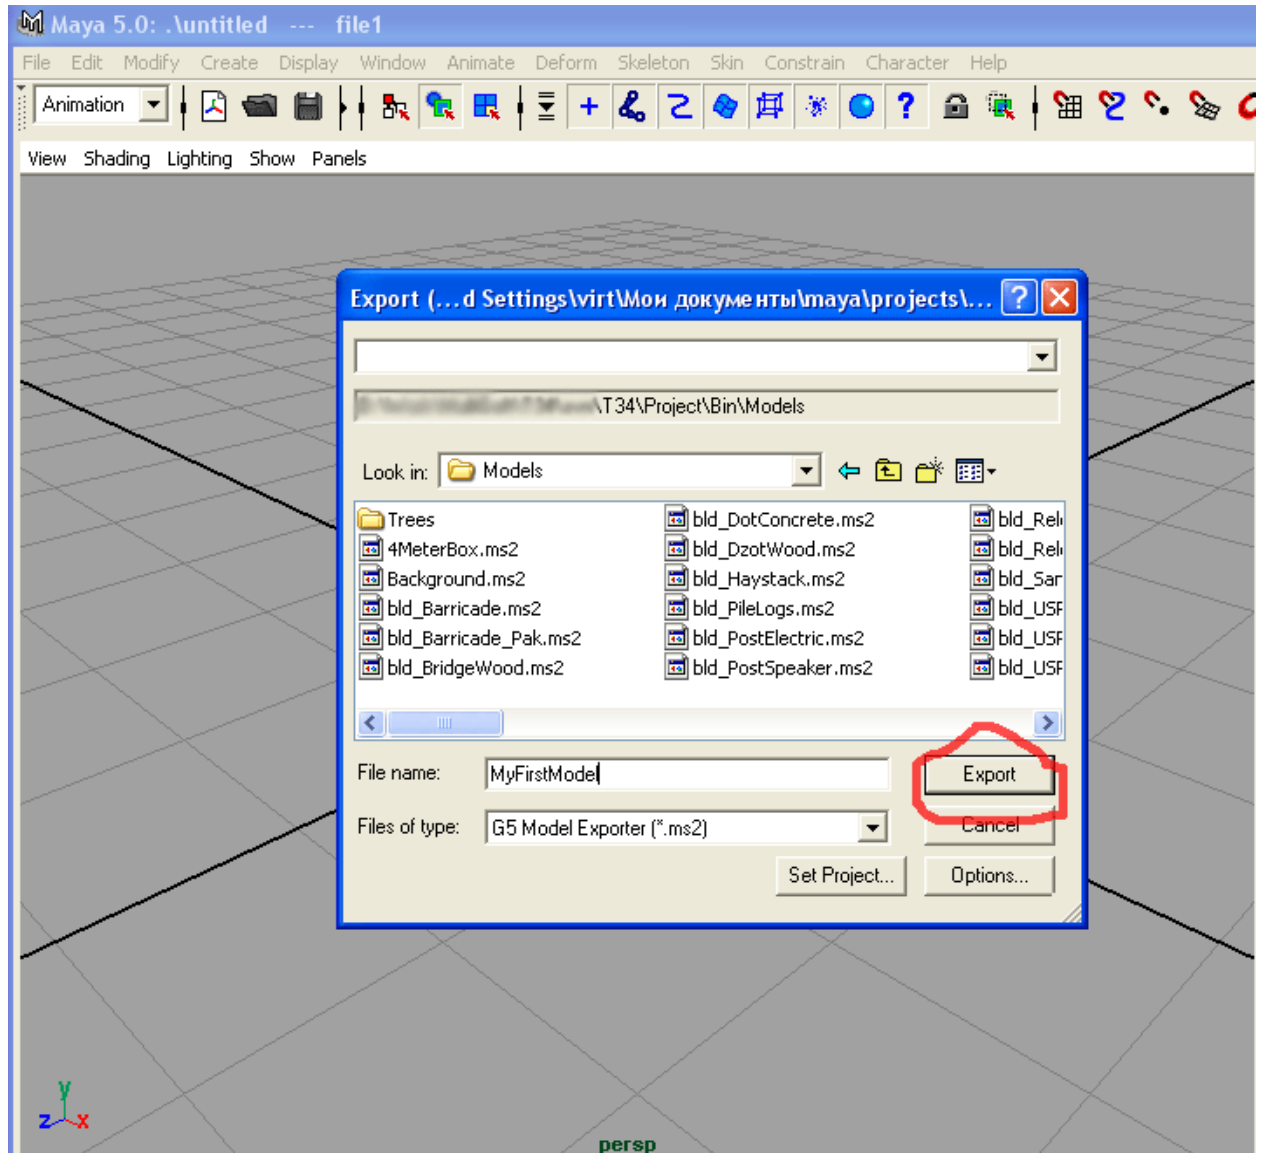

5. Texture selecting.

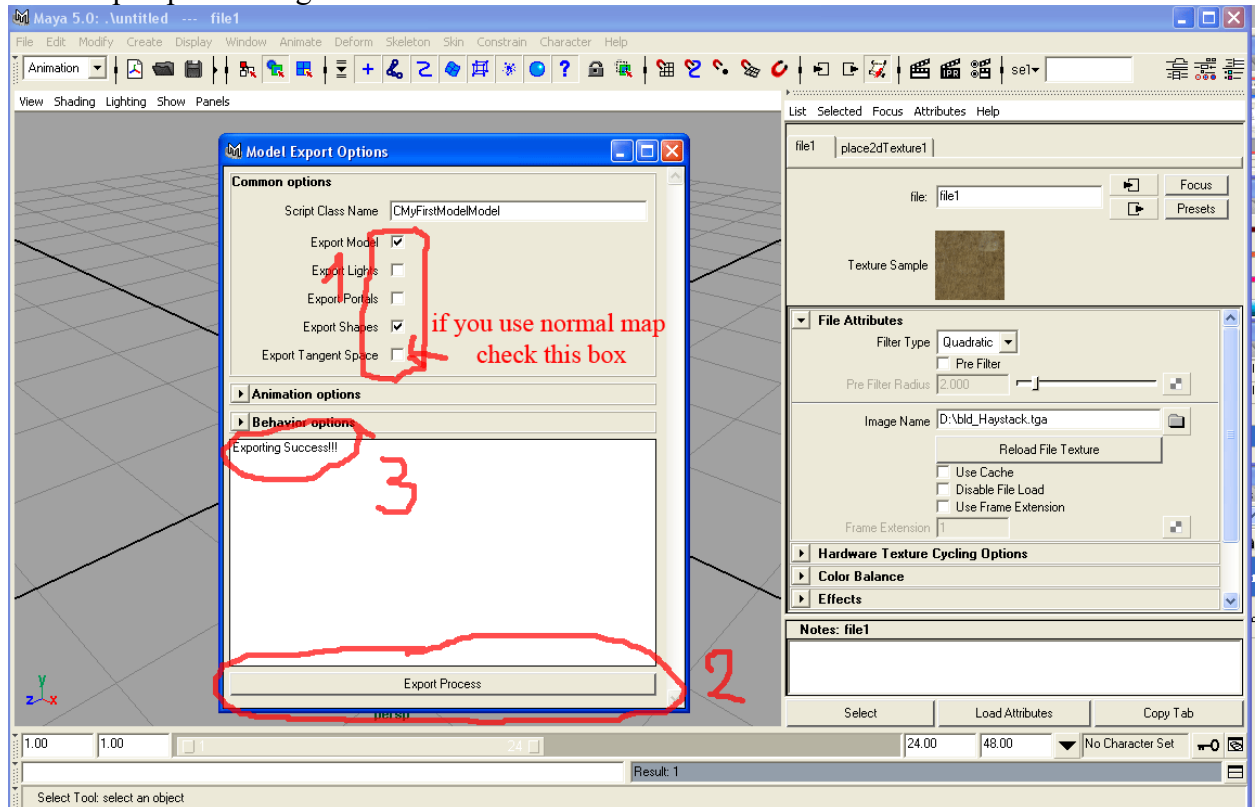

6. Select Export All.

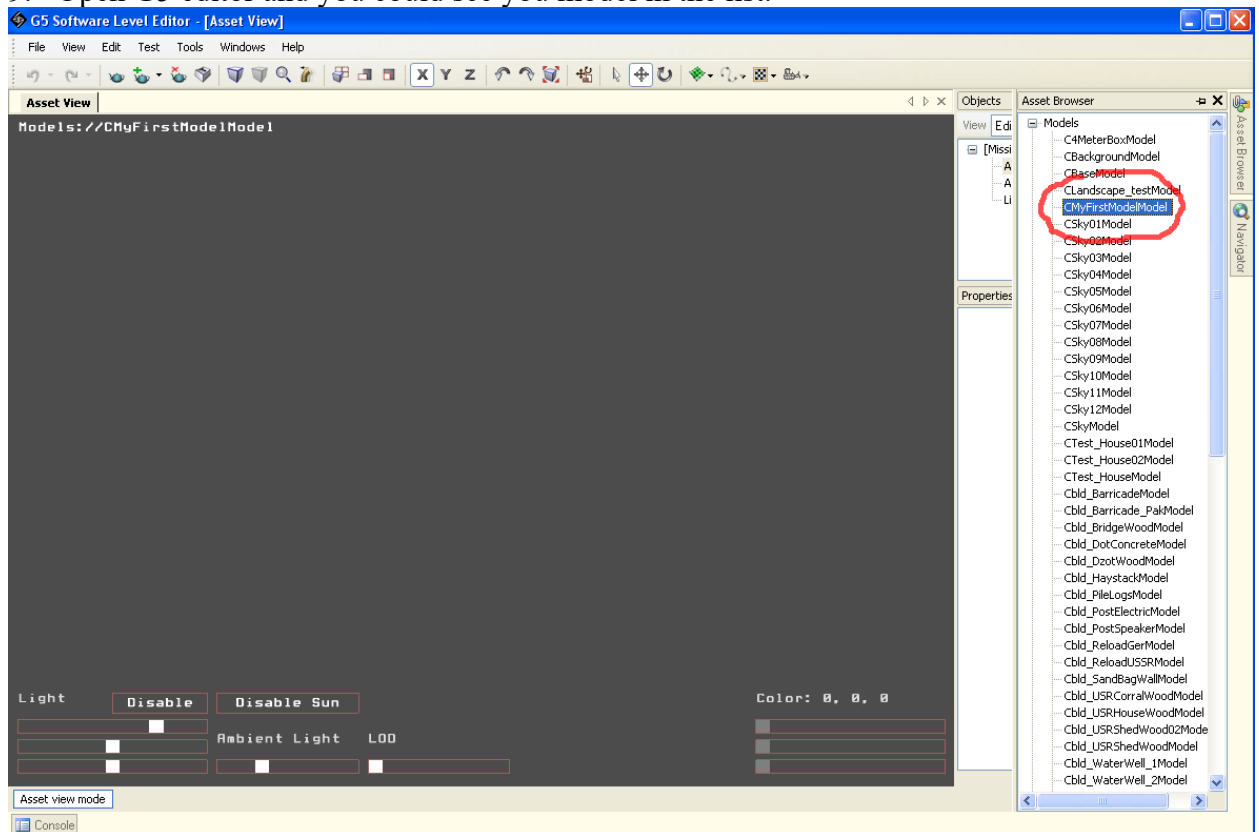

7. Save to file.

8. Setup export settings.

9. Open G5 editor and you could see you model in the list.

10. Zoom out.
